Procedure: Spay _____ Castration _____ Dental _____ Other _____

ANESTHESIA / SURGERY RELEASE

I am aware that the practice of medicine and surgery is not an exact science, and understand that there are risks attendant with any procedure. These risks and possible complications include, but are not limited to, infection, bleeding, damage to internal organs, anesthetic complications and possible death. I acknowledge that no guarantees have been made to me as to the result of the operation or procedure performed. I also authorize the performance of any procedure, in addition to or different from those now contemplated, which the veterinarian deems necessary or advisable in their professional judgment, and in accordance with reasonable medical standards.

Signature: _____ Phone: _____

PRE-ANESTHETIC TESTING

If your pet is over 7 years of age, we require pre-anesthetic bloodwork to help detect any problems that could increase the risk of anesthesia. If your pet is 7 years of age or younger, it is less likely that there could be pre-existing problems present, however it is a possibility. As such, we recommend a pre-anesthetic blood screening be done when possible to help detect any problems prior to anesthesia. The cost of the pre-anesthetic blood screen is \$75.00
Please initial below.

I would like the pre-op screening _____ I decline the pre-op screening _____

PAIN MEDICATION

Some pain is always present after a surgical procedure. We give the patient a pain injection at the end of surgery. The cost of the medications depends on the size and species of the patient, an approximation of the cost is listed below:

Cats 10 pds and under	\$15.00	Cats over 10 pds	\$20.00
Dogs under 50 pds	\$15 to 25.00	Dogs over 50 pds	\$ 25.00 to 35.00

Please initial below.
